Summary

As an interactive developer I am intently interested in the end-user experience and work closely with information architects and designers to build and deliver products that are innovative, engaging, and highly functional.

Experience

Senior Developer • Intentional Futures • Jan 2015 - Present

Developed and mainted www.intentionalfutures.com using a variety of modern web technologies

Managed multiple projects, small teams of contractors and reported directly to clients

Developed prototypes that included low fidelity mockups and high fidelity functional web experiences

Participated in both primary and secondary user research projects including strategic marketing campaigns targeted at developers

UI Developer • Starbucks • March 2014 - Sept 2014

Improved UI Development practices by making collaborative design a priority through frequent working sessions amongst the UI team

Developed and maintained key features of the Starbucks website

Redeveloped the consumer facing Starbucks web Styleguide

UI Developer • LiveAreaLabs • June 2013 - Jan 2014

Provided UI development support during the design and development process for LAL's clients, including development on the responsive redesign of the ecommerce website for Brooks Running

Front-end Developer • Garrigan Lyman Group • Aug 2012 - June 2013

Led team of designers and developers for the relaunch of glg.com and the launch of several client projects including Microsoft and Tmobile

Professional Skills

High level knowledge of modern web technologies including HTML5, CSS3 and JavaScript

Working knowledge of AWS, Github React.js, Backbone.js, MVC arcitecture, grunt, gulp and webpack

Experience with Sketch, framer.js, Adobe Photoshop and Illustrator
